Student Research Policy

Preamble:

Student as researchers exemplifies new attitudes and ways of working with young minds in a Medical college. It promotes a partnership between a teacher and the student where there is mobilization of knowledge mutually which enhances learning. Students, as researchers seek to involve, not merely using young people, viewing them not just as recipients or targets, but as resources and producers of knowledge.

Aims of the policy

1. Provide guidelines for the conductance, presentation and publication of research work
2. Provide essential infrastructure support for research work
3. Promote research and motivate the students

Guidelines

1. Motivated students to approach the guides for start of the research.
2. The students can carry out projects seeking internal funds or can apply for external funded projects
3. The projects denied of external funds can apply for SDUAHER grants to support the work.
4. The project should be submitted to Institutional Ethics Committee for approval through proper channel
5. The research conducted at Sri Devaraj Urs Academy of Higher Education and Research should be conducted as per the guidelines by UGC/ DSIR/ ICMR fulfilling other ethical/ legal requirements
6. The students should attend state, national and international undergraduate conferences and present their work in these conferences as either oral presentation or poster.
7. The research work by student should be presented by student preferably, in rare circumstances the faculty can present the work with no objection certificate by the student.
8. Travelling grants in the form of registration fee, TA and DA will be provided by the Academy on submitting the documents for proof of presentation along with ethical clearance for publication.
9. Students applying for external student funded projects (ICMR-STC) should be the first author and the guide to be second and corresponding author.

10. Authorship criteria should be strictly followed. The authors should contribute in conceiving and designing of the study, acquisition of data, analysis and interpretation and critical evaluation of intellectual content.
11. The order of authors must be directly proportional to the contribution towards the research work.
12. The incentive for publication will be provided as per the Institute's Incentive Policy.
